# THE GREATEST POSSIBLE BENEFIT FOR OUR CUSTOMERS!

## Every compressed air station has the potential for optimization

Over the last decade, our customers became leading names in the cutting edge world of the industrial, automotive and consumer products. We consider these professionals to be not only loyal clients but also long term partners.

A selection of the companies that rely on compressed from YAMMINE TRADING day in and day out:

- Lebanon Chemicals
- Liban Cables
- Liban Jus
- Air Liquide-Liban Filiale SOAL
- Crown Flour Mills
- Debbas Industries
- Naggiar Industries
- Noujaplast
- American University Hospital
- Eye & Ear Int'l Hospital
- Petco
- Modern Industrial Products
- General Packaging Industries
- Gemayel Freres
- Ploytek
- Patchi Industrial
- Porsche Center Lebanon
- T.Gargour & Fils
- Alakso
- Aluxal
- Demco Steel Industries
- Horizontal Tempering Glass
- Raidy Printing Group
- Advanced Plastic Industries

Our quality standards mean you can rely on our machines

- services 24/7
- extend your warranty
- Save Energy
- maintenance contracts

## SERVICE 24/7

### CLOSE TO CUSTOMERS: YOU CAN RELY ON US!

We see it as our responsibility to be able to satisfy the requirements and wishes of our customers at all times. A well-established service network ensures direct accessibility for the customer. Experienced compressed air experts and project engineers are available to you and will give you honest, competent advice. When needed, our team will give you support and will help you within a matter of a few hours. It goes without saying that we keep the most important spare parts at the ready locally. All our employees are qualified according to national and international regulations. They receive constant training and advanced training. Hence they are always familiar with the state-of-the-art.

We are your competent partners, always at your service. We will inform you about:

- Supplying you with original spare parts
- Maintenance contracts prepared specifically for your requirements
- Dates of training courses
- Our concept: the hotline for your entire compressed air supply " Cell. +961 3 111883 "

First class products, expert partners, convincing service. The conditions for a cooperation could hardly be any better. [Challenge us!](#)

# ENERGY BALANCING SYSTEM up to 75%

## SIMULATION ALONE PROVIDES THE FACTS

The 3-stage plan establishes clarity regarding energy cost.

The Energy Balancing System can solve your energy problems.

This energy-balancing system indicates how the entire compressed air system can be operated with maximum energy efficiency & how to eliminate the power guzzlers.

The Energy Efficiency Systems comprises the following three steps:

- Measurement
- Analysis
- Simulation

The benefit of measuring compressed air consumption with subsequent simulation is obvious.

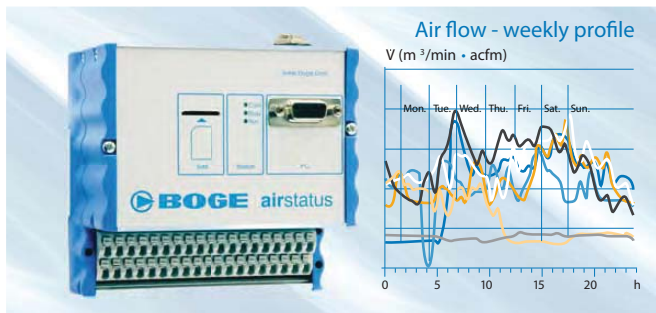

- The overall compressed air system becomes transparent
- Weak points are revealed
- A large number of tables and graphic representations support your decision-making process
- The effects of changes in the compressed air station can be simulated
- Hence it is possible to run through all scenarios & develop the optimal solution for your situation

Station	Flow	Power	Energy	Cost	Peak
Station 1	1000	1000	1000	1000	1000
Station 2	2000	2000	2000	2000	2000
Station 3	3000	3000	3000	3000	3000
Station 4	4000	4000	4000	4000	4000
Station 5	5000	5000	5000	5000	5000
Station 6	6000	6000	6000	6000	6000
Station 7	7000	7000	7000	7000	7000
Station 8	8000	8000	8000	8000	8000
Station 9	9000	9000	9000	9000	9000
Station 10	10000	10000	10000	10000	10000

Individual advice on how to optimize the costs of a compressed air station can only be given on the unerring basis of information gained beforehand and the simulation of future overall plant or compressed air concepts.

After all, "it is better to know than to assume".

Reason enough for the YAMMINE TRADING specialists to establish your current compressed air consumption by measuring it exactly, enabling them to work out an optimal system solution together with you.

## EXTEND YOUR WARRANTY up to 5 Years

### BOGE Bestair

For four generations, customers from mechanical engineering, industry and trade have relied on BOGE know-how when it comes to planning, developing and manufacturing compressed air systems. They are fully aware of the fact that BOGE AIR is more than just ordinary compressed air: utmost safety, outstanding efficiency, excellent quality, maximized flexibility along with dependable service are the ingredients to transform BOGE AIR into air to work with-in Germany, in Europe & in more than 80 countries around the world.

#### Our services:

- Efficiency development
- Planning and engineering
- Plant control and visualization
- Oil free piston and screw compressors
- Screw compressors with oil injection cooling & oil lubricated piston compressors
- Compressed air treatment
- Compressed air conduction and storage
- Compressed air accessories
- Compressed air service

The all-round carefree package for your BOGE compressed air station:

**5 year warranty** BOGE bestair is intended to extend the warranty on your compressed air supply beyond the regular period of twelve months.

**5 years reliability** BOGE bestair is designed to secure an extended 5-year factory warranty on new compressed air stations equipped with oil injected screw compressors. The following components are covered by the bestair warranty.

Contact our service center [service@yammine.co](mailto:service@yammine.co) for more details on the advantages of **BOGE bestair!**

## WE CAN OFFER YOU 3 ALTERNATIVE WAYS OF MAINTENANCE

YAMMINE TRADING maintenance guarantees that your systems are always in full working order - **NO WAITING !**

Our maintenance contracts give you the following advantages:

- Support by an expert
- Manufacturer competence
- A clear definition of the scope of services
- A guarantee on all work carried out
- Extended guarantee if a maintenance contract is concluded
- Quantity discount for the maintenance of more than one machine
- Maintenance of complete stations (also mixed stations)
- Original spare parts of the respective manufacturer, even in the case of other makes

- YAMMINE TRADING offers you a choice of three individually structured maintenance contracts:

- Premium
- Premium-Plus
- Full-Service

# MAINTENANCE CONTRACTS

This maintenance contract minimizes the risk that your plant has to be put out of operation owing to defects or faults by means of regular, precautionary inspection

## Premium

We guarantee that the statutory regulations are observed.  
We monitor and meet the recurring maintenance dates without you having to worry about them yourself.  
And the best thing about it: the costs remain calculable.

The Premium maintenance contract offers you the following advantages:

- You can reckon with fixed and calculable maintenance costs.
- For maintenance on one compressor you receive a **3% discount** on spare parts and wear parts.
- If maintenance is carried out on more than one compressor you receive a **5% discount** on spare parts and wear parts.
- You extend the machine's service life by using original spare parts.
- You obtain a **2-year** guarantee on the plant.

## Premium Plus

With this maintenance contract, you not only enjoy all the advantages of the Premium maintenance, you also ensure maximum operating reliability and availability for your plant.

The Premium Plus maintenance contract gives you the following additional advantages:

- You receive maintenance including the elimination of all faults and all travel costs at an interesting flat rate.
- In emergencies you will be given a plant on free loan within 24 hours.
- This assures you maximum operational reliability and availability.

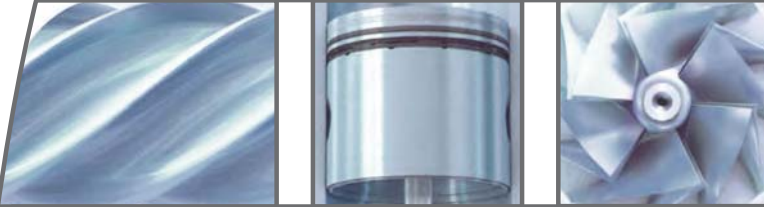

And if at any time your compressor cannot be reconnected within a short time, we will install a hire plant **within 24 hours free of charge**. Expensive downtimes and waiting times are simply not on.

## Full-Service

The Full Service Maintenance Contract offers you the following additional advantages:

- You receive maintenance, including the rectification of all faults, all spare parts, all wear parts, and all travel expenses at a flat rate.
- You can calculate with fixed maintenance costs.
- This is the best way to minimize the costs for loss of output.
- You save energy because the plant always operates with maximum efficiency.

### In line with the customer's needs

With our innovative system concepts we offer customized solutions for almost all applications. Our endeavor lies not only in supplying compressors, we

offer ourselves as a competent system provider capable of offering solutions to all users of compressed air. That does not only apply to the consultation and installa-

tion phase of your new compressor(s), but naturally continues in all areas of service, maintenance and visualization. **Challenge us!**

### Reliable Service

Our company runs its own maintenance & rebuild department, serving all packaged compressors, vacuum system & their relevant components of pneumatic equipment and tools.

Additionally, we highlight our readiness to servicing different brands, moreover a speedy on location technical team covers our clients' needs pertaining to trouble-shooting and analyses.

Also, periodical maintenance service contracts are projected to our clients providing a quality control assurance in order to maintain our professional standard aiming for complete customer satisfaction.

### Performance & Achievement

YAMMINE TRADING always aims for complete customer satisfaction regardless of the technical difficulties. This approach is being applied through our highly experienced technical department by providing complete solutions such as:

- Consultations: We are always ready to dispatch a highly trained team member to any location, at a courtesy discharged fee to our customers.
- Planning: Detailed studies & clear applied plans are provided to potential clients who benefit from our expertise in installing long term set up.
- Diagnosis: We treat any eventual problem with the utmost urgency. In cases like these, we are as swift as can be on location in order to diagnose the problem and to fix the machinery up & restore its productivity.

### Problem Solving

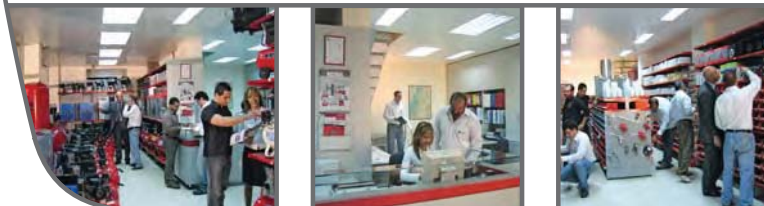

Furthermore, despite maintenance, repair services & spare parts available in stock, we also provide all types of reciprocating and screw-type air compressors & corresponding tools, accessories & wide variety of spare parts as well as vacuum pumps.

We feel more comfortable helping fast replenishments to our clients covering most of their needs & requirements.

Repair, Rent or Buy a used air compressor / air dryer / vacuum system:

& more brands
